

DDC Control System

CONVENIENT & COMPLETE INFORMATION

- All-in-one view; easy to monitor
- Ensures process repeatability
- Remove operator error
- Visual alarms; easy to troubleshoot

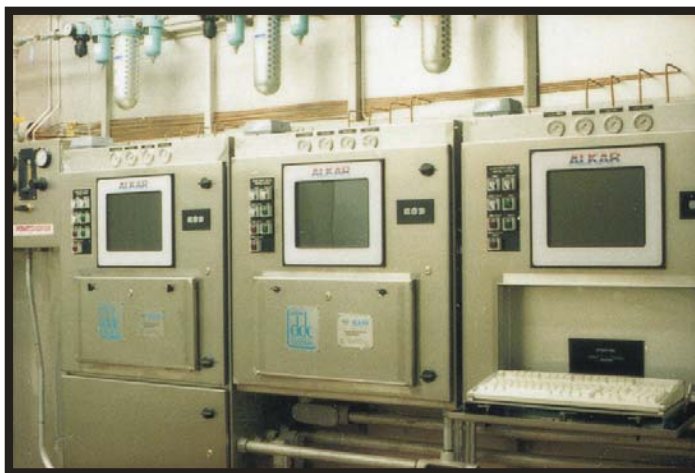

PROPER HACCP DOCUMENTATION

- Operator comments and alarms time stamped with process data
- Lot ID, operator name, and oven number stored with process data
- 8-probe readout; can disable bad probe

- Eliminate Inaccurate, confusing chart

RETROFIT EXISTING OVENS

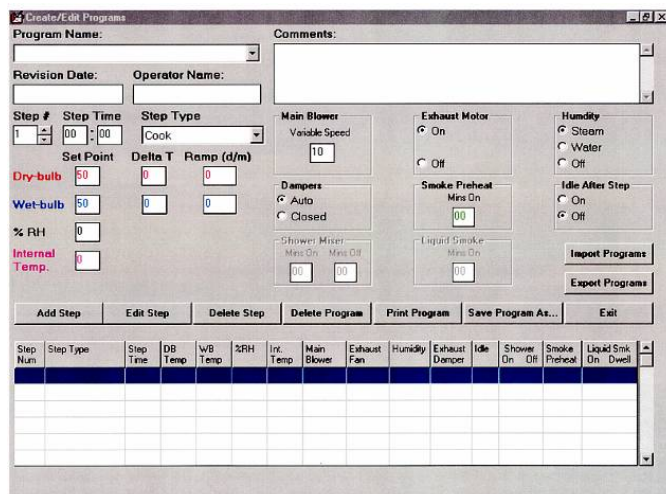

- Allen Bradley ovens
- Network capable

- Click and drag to zoom into chart
- Download to any available network drive or disk
- Print temperature intervals 1 to 60 minutes

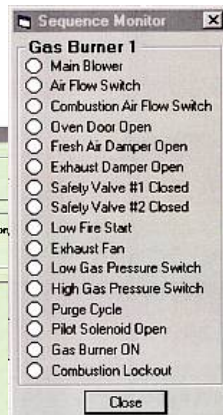

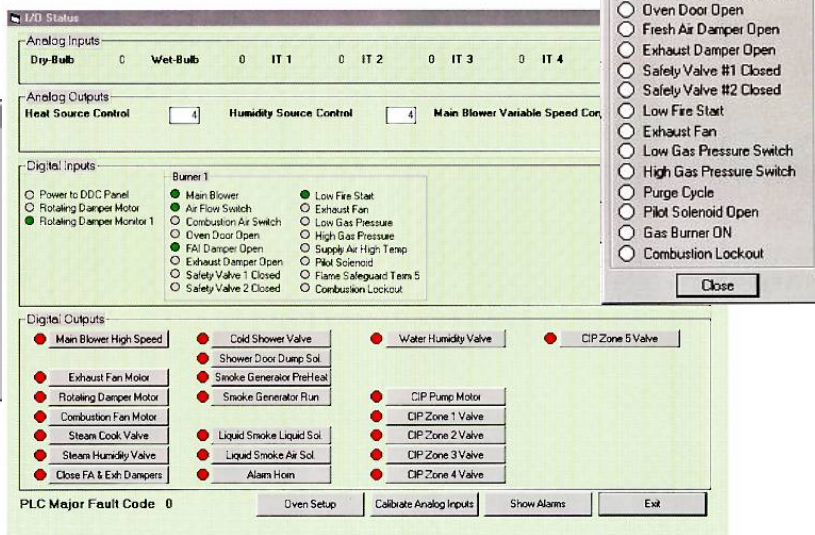

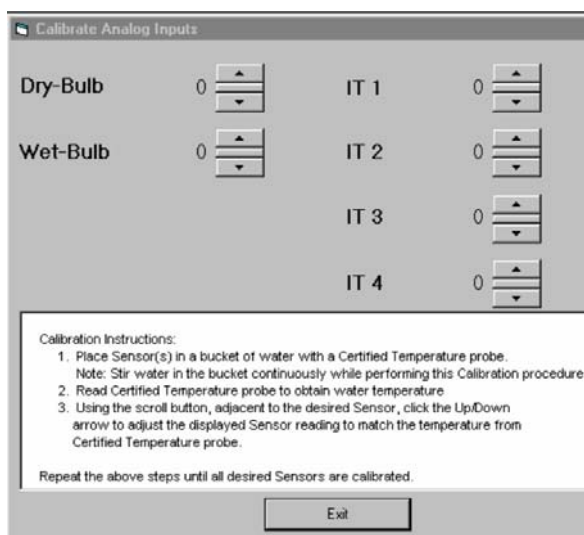

Visit the **Process Controls** section under **Equipment** at www.alkar.com for more online controls demo.

DDC Control System

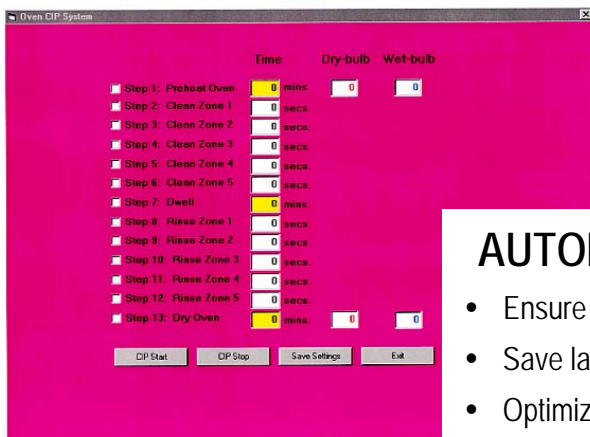

FLEXIBLE PROGRAMMING

- All-in-one view; easy editing
- Automatic revision date
- Comment field for process/recipe notes
- Full flexibility to control oven components for each step
- Transfer programs to/from other DDCs without reprogramming

EASIER & FASTER TROUBLE-SHOOTING

- Check remote gas burner sequence monitor
- Calibrate quickly and easily
- Integrated PM scheduled based on hours of operation
- Alarms logged for analysis

AUTOMATED PROGRAMMABLE CIP

- Ensure consistent cleaning and rinsing procedures
- Save labor, chemicals, and water
- Optimize process for each oven's condition
- Documented for history
